**BOX CULVERT REPLACEMENT ON US 3/NH 25 IN MEREDITH**  
***EIGHT WEEK PROJECT WILL REQUIRE ONE LANE TRAFFIC***

The New Hampshire Department of Transportation announces work is scheduled to begin Thursday, March 4, 2004 on the replacement of a box culvert over Hawkins Brook on US Route 3/NH 25 in Meredith.

This project will require single-lane traffic for approximately eight weeks. Temporary traffic signals, warning signs, barrels, and concrete barriers will assist motorists through the work zone. Motorists are asked to use caution when driving through the area. Minor delays can be expected.

In the case of inclement weather, work on the project will be postponed until the following workday.
